Professional Summary

Associate Software Engineer with **two years** of experience designing and developing robust software solutions. Specializing in building scalable microservices using .NET and Java, with a focus on high-performance APIs and cloud-native applications. Expertise in optimizing SQL databases, implementing complex stored procedures, and enhancing query performance. Proficient in deploying solutions on AWS, applying SOLID principles, and following clean architecture for maintainable and efficient code. Aiming to contribute to impactful projects with strong technical skills and problem-solving abilities.

Technical Skills

- Programming Languages: C# (.NET), Java, SQL
- Web Technologies: .NET Core, SpringBoot, Angular, RESTful APIs
- Database Management: SQL (Oracle, PostgreSQL), NoSQL (MongoDB), Dapper
- Cloud Services: AWS (EC2, ECS, S3, RDS, Lambda, Secrets Manager)
- Tools & Frameworks: Docker, Git, Kubernetes, Kafka, JWT, Redis, Microservices
- Performance Optimization: Caching (Redis), Indexing, Query Optimization

Professional Experience

Associate Software Engineer

ICICI Lombard GIC — Mumbai, India June 2023 – Present

- **Migrated the Motor Insurance database** from Oracle to PostgreSQL, resulting in Rs.20M+ annual savings in licensing costs and improved long-term system maintainability.
- Developed and deployed a scalable microservice to **manage policy deviation workflows**, using .NET Core and AWS ECS, enhancing flexibility in business rule handling and improving system scalability.
- **Revamped dashboards** across core applications by implementing optimized queries, indexed views, and pagination, **improving data fetch performance by 30%**.
- **Reduced overall database load by 20%** by implementing **purging policies**, **parameterized SQL queries**, and **indexing strategies** across 40+ APIs and multiple database systems.

- Consolidated **four microservices** into a single scalable service, following clean architecture and SOLID principles, which reduced service management overhead by **12%**.
- Led system-wide **performance improvements across 25+** microservices, including **.NET upgrades** (6.0 → 8.0), **caching enhancements**, and code-level optimizations, significantly improving response times and system stability.
- Resolved **100+ security issues** from Checkmarx and SonarQube, **reducing vulnerability backlog by 20%**.

Software Development Intern

Glance – InMobi Group — Bengaluru, India July 2022 – December 2022

- Developed an automated Android application testing tool for stress testing and resource consumption analysis, reducing testing time by **30%**.
- Enhanced troubleshooting skills by resolving complex technical issues during the development lifecycle.
- Expanded technical knowledge by attending more than five industry conferences, workshops, and training sessions.

Machine Learning Intern

Starmark Software — Bengaluru (Remote), India May 2020 – July 2020

- Designed and developed a machine learning (ML) model to analyze logs, enabling automated issue detection and improving system monitoring across **three log streams**.
- Participated in code reviews to ensure high-quality code standards.
- Improved data quality by addressing inconsistencies, missing values, and outliers in datasets.

Projects

- **Samudbhav – Community Web Application:** Built using .NET Core, Angular, PostgreSQL, and Redis, this platform supports community membership, donations, and awareness initiatives. Includes *Supatham* (educational hub) and *Adrishyaa* (e-commerce module promoting local artisans).
- **Portfolio Website:** A personal ASP.NET Core MVC application featuring a blog and newsletter system, with over 50 active subscribers, showcasing development skills and professional work.
- **Android Applications (Java):** Developed multiple Android apps in Java, including a music player, camera app, calendar with integrated to-do features, and a 2048 puzzle game.
- **Reinforcement Learning:** Enhanced Deep Reinforcement Learning models through transfer learning across different games to improve learning efficiency and performance.
- **Non-Linear Optics Research:** Conducted research on correlated photon interference and single-photon generation.

Education

- **B.E. (Hons.) Computer Science**, BITS Pilani K.K. Birla Goa Campus — Goa, India August 2018 – December 2022
- **Class XII**, P.C.M, Sri Chaitanya Narayana Jr College — Vijayawada, India June 2016 – May 2018

Volunteering Experience

- ❖ **Nirmaan Organization**: Volunteered to teach underprivileged children in Zari, Goa, providing weekly lessons in various subjects.

Additional Information

- **Open-Source Enthusiast**: Actively contributing to open-source projects and building [samudbhav](#) community platform.
